**250.06 STORM DRAINAGE MANAGEMENT** *(Amended 10-11-22)*

1. Private Property owners are responsible for storm drainage flowing through their property.
2. Putnam County does not maintain drainage utility easements (including culverts, concrete channels, retention walls, retention ponds, detention ponds, etc.) located on privately owned property.
3. Private drainage and erosion issues, as well as ground water issues (i.e., natural springs), are the responsibility of the private property owner (and/or any applicable homeowner's association or maintenance association). Putnam County is not responsible for ensuring proper drainage on privately owned property. In general, the easement holder (property owner) has the duty to maintain the easement. This includes public drainage utility easements located on private property.
4. Driveways, and their associated culverts, bridges, or other appurtenances, that cross public drainage systems (i.e., ditches or streams) are also the private property owner's responsibility.
5. Drainage directed from gutters, French drains, downspouts, swimming pools, retention walls, or other private systems to neighboring properties is a civil matter between the private property owners. Moreover, private property owners that place obstructions, or fail to maintain property within public drainage easements (i.e., structures, sheds, buildings, curbs, retaining walls) may be subject to civil action from adjacent property owners.
